

About Kairos

Kairos Computer Solutions is a home-based business serving the needs of home users, home-based and small businesses.

The owner, Larry Hamilton, is committed to quality work at affordable prices. The technicians at the big name electronics stores can charge hundreds of dollars just to walk in your door.

Rather than leave you spending enough to buy a new computer, Larry can tell you if your computer is worth fixing or cheaper to replace.

If you need a web site or computer training, a fee can be arranged to fit your needs without breaking your budget.

Why Kairos? Greek has two words for time. *Chronos* (χρονος) which is measured time, like a clock, and *kairos* (καιρος) which means the right time or opportunity. *Now is the right time for a computer solution.*

Goals

We strive to help organizations and businesses have a positive experience with computers and the internet.

Our focus is empowering people and businesses to leverage the power of their computers and the internet to their advantage. Computers and the internet are tools to be used and enjoyed rather than feared.

Kairos Computer Solutions is committed to helping you figure out what you need, rather than trying to sell you something you do not need or understand.
